

# PROMETHEUS

## Flame System

The Prometheus is an extremely versatile system that can provide up to 40 feet of flame on command. It can be mounted using a variety of methods. The burner is water and weather resistant. With a central rack mount controller capable of handling the DMX control of multiple burner heads, or a single head controller, this system provides a reliable and cost-effective option for companies who need a rugged and sleek flame system that exceeds industry standards. The Prometheus is listed by ARL testing lab to the NFPA 160 standard. This unit can be fueled by the any of the FCL, FCH, or FP series fuel systems we offer.
