

CONFETTI GERB

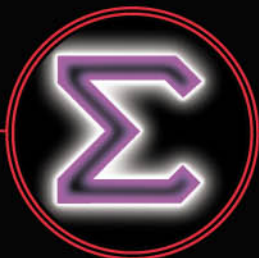

Dual System

This confetti system utilizes two horns for maximum height. The 3" gerb can boost confetti up to 50 feet and is great for indoor venues. The 6" gerb can project confetti up to 100 feet which is perfect for outdoor venues. Either way, each unit can throw 50 pounds of confetti in less than a minute. Each unit operates off of two 50 LB. CO2 syphon tanks. We provide two 20 foot CO2 hoses with a ball valve for easy installation and use. They may be purchased with or without a road case.

Specifications

- 6" GERB WITH ROADCASE
- 31 X 30 X 43
- 195LBS
- 3" GERB WITH ROAD CASE
- 22 X 22 X 36
