

CRYO₂ JET

Cryo System

The Cryo₂ Jet is a state-of-the-art cryogenic effect system capable of producing plumes of Cryo fog up to 20 ft high using liquid CO₂. The system is built from top grade industrial components which yield a very rugged device for reliable and repeatable operation. Its small size and adjustability allow it to be mounted in a wide variety of applications. The Cryo₂ Jet can be used with high pressure liquid CO₂ tanks or refrigerated liquid CO₂ dewar tanks.
